Event Type:

Event Description

Update as of 10 am Kyiv time (March, 2, 2022):

Ukraine's operating nuclear power plants are operating normally.

There are no violations of NPP safe operation limits and conditions.

Radioactive situation meets established norms.

Systems of NPP physical protection work in normal mode.

Situation at Chernobyl NPP without changes: there has been no change of operating personnel. The online resource of the

Automated Radiation Monitoring System in the Exclusion Zone of the Chernobyl NPP is not yet available.

Radioactive waste disposal sites of the Radon Association without changes (staff on-site). At radioactive waste disposal site of the

Kharkiv branch of the Radon Association a transformer was damaged as a result of artillery shelling and not yet repaired.

The neutron source nuclear facility has been put into a deep subcritical state. A shift of operating personnel is working as normal.

The situation remains under control.

The Nuclear Research Institute research reactor is in shutdown and under control.
